

Project Planning Phase

Milestone and Activity List

Date	11 November 2022
Team ID	PNT2022TMID25338
Project Name	AI Powered Nutritional Analyzer for Fitness Enthusiasts

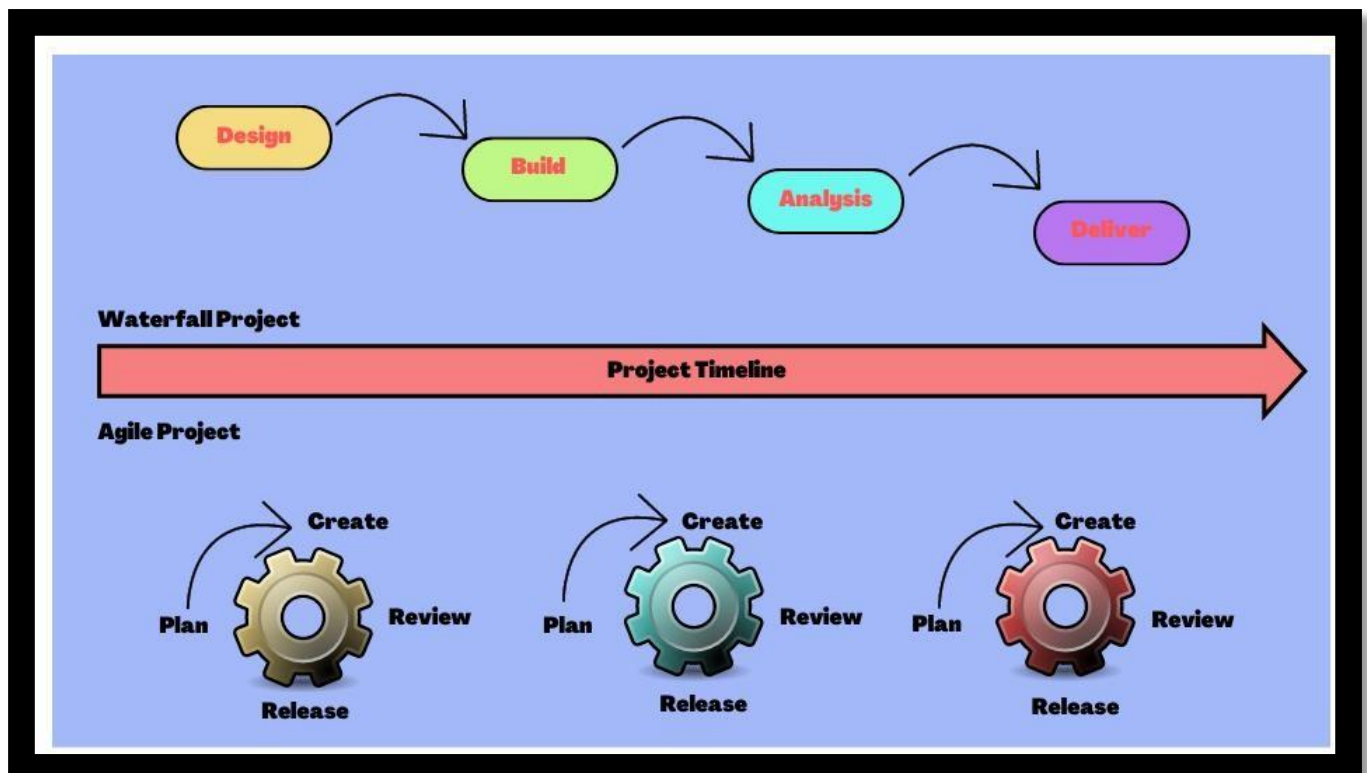

Milestone:

Analytical chemistry, which reveals information about processing, quality control, and food contamination, places a high value on determining a food's nutritional composition. The main objective is to create a programme that describes colour, form, texture, and other attributes. The user takes a picture using the app, and the programme analyses it and determines the nutrition from it.

Activity List:

Planning the project's timeline is a crucial role in project management. Four phrases make up the project, and various tasks are assigned to and completed by the team members. Those are

- Phrase 1: Collection of Information and Requirement Analysis.
- Phrase 2: Project planning and Execution.
- Phrase 3: Implementing the High Efficiency of Deep Learning Algorithm for better performance.

- Phrase 4: Deploying the application and Testing the application.
